

# DRIVING FULLY OPEN SOURCE ENTERPRISE READINESS FOR POSTGRES

**Alastair Turner**  
Community Technologist

Percona Live, Mountain View, May 2026

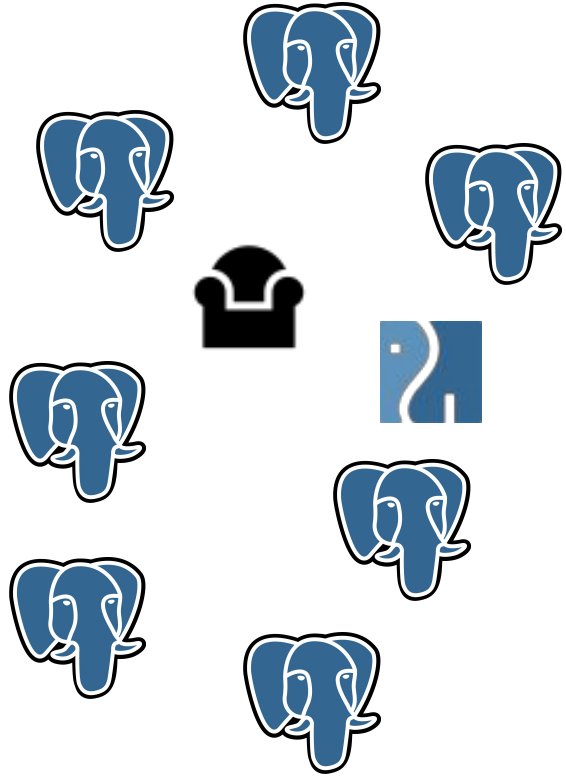

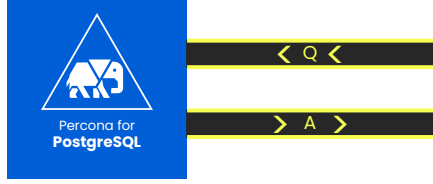

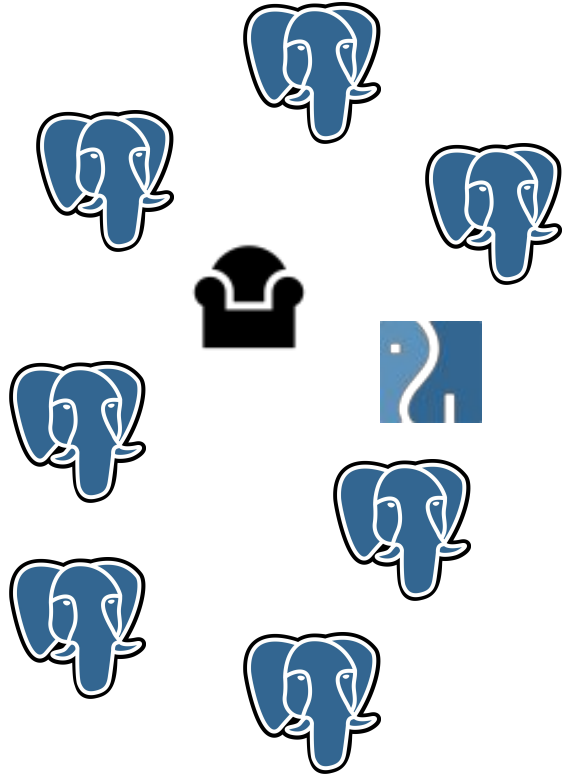

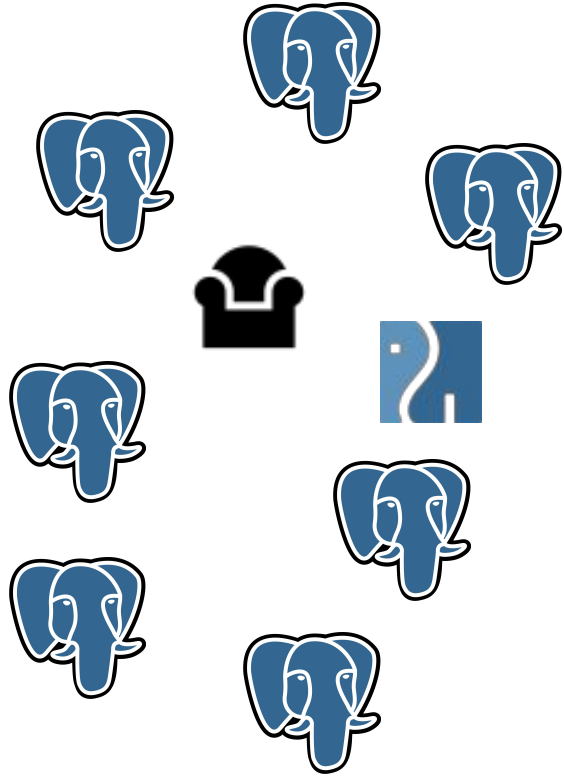

# THREE THINGS PERCONA DOES

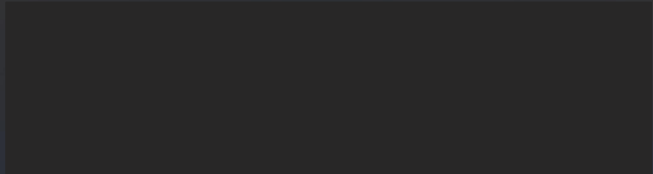

**to make enterprise ready Postgres fully open source**

**Dance**  
like no one  
is watching

**Encrypt** like everyone is

# ▶ Addressing the community challenge

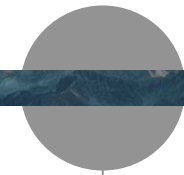

- Postgres community's depth and openness can stretch out debate on features
  - Particularly areas with technical complexity beyond database internals
- Annual release cycle and no community pattern of tech preview or experimental features
- Build new functionality as extensions
- Propose new extension points upstream
- Ship new extensibility in Percona Distribution for PostgreSQL

## pgBackRest

Boring until it's not. *Until it is again*  
Fund open source. Protect the foundation.

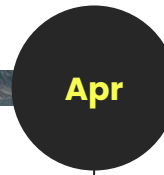

Here be  
History

## March

So who is funding this thing?  
Everybody overestimates the denominator

April 27

Archived, unfunded, ~~dead~~

## May 19

[pg]BackRest's back.  
Alright!

**THANK  
YOU**
